

# Tabitha: Food for LIFE

2009

**January:** Welcome to 2009! This month I am going to dedicate this space to some pictures from a day at HFTN and the Food for Life program. Enjoy. I will also be posting some video from the same day on my video blog if you are interested to have a look. You can access my video blog from my website at the bottom of this page. The picture in the banner above is of Princess Nina. She is getting much needed nutrition these days as she was recently diagnosed with Rickets. Liz has been helping her to get Vitamin the vitamin D she needs by mixing fish oil in with her food at the feeding program. She really is a princess.

### Prayer points:

- Our numbers have been down slightly the last little while. Please pray for wisdom to reach out and find the most needy children.
- We plan on expanding the program to another area in the next few months. Please pray for wisdom and strength as we grow.
- Please pray for the parents and families of the children that we work with. That God would touch them and lead them into His kingdom.
